

## LESSON PLAN - STUDY SKILLS KS5

### Summary

These resources makes students aware of the key differences between study in sixth form/college and the level of study required to succeed at university. The resources cover aspects such as academic reading, presentation skills, essay writing, and independent study.

#### The main aim is

To aid in the development of learner's independent study skills. This will help them as they make the transition to university level study.

**Linked to Shaping Futures Learning Objective:** Learners will appreciate key differences between learning in school and HE  
**Linked to Gatsby Benchmark:** 3 & 7

#### The rationale for the lesson aims: what skills will be developed?

- Presentation skills
- Note taking and academic reading
- Academic writing and how to plan an essay
- How to work effectively online

#### Anticipated difficulties for learners:

Students with limited access to internet may not be able to access some of the online tutorials.

#### Materials and aids to be

Workbook, videos and tutorials - available to download from the Shaping Futures [website](#):  
Each resource will provide students with instructions on how to use them

#### Additional task if required:

- Ask the students to record a presentation/vlog on a topic of their choice using skills acquired.
- Contact SF for suggested course reading lists [here](#)
