

Critical Reading

So far this week we have covered the importance of study skills and effective note taking. If you haven't already seen this, you can find it on Tuesday's resources.

Also, a huge part of improving your study skills is getting into the right frame of mind, managing your time and your stress levels. We have covered this extensively during our 'wellbeing week' which can be accessed in week 1.

You can also find some helpful links around wellbeing in our signposting page on Friday's resources.

No matter what subject you study at university you'll be required to read a great deal of books, journals and articles.

During your time at university, you'll learn that you read for a number of various purposes:

1. For specific information
2. For understanding – to get a general overview of a topic
3. For analysis – thorough critical analysis of sources helps you get higher marks

Complete the [tutorial](#) to understand what critical reading means and learn strategies to allow you to critically evaluate an academic source.

If you'd like to know more about studying at university, get in touch a member of our team [here](#).
